Summary

AI Product Manager with ∼3 years across AI/ML engineering and product, building B2B and B2C AI products. Shipped a financial settlement platform **live with 2 large enterprise customers**, and AI features that drove a **12% DAU increase** and **35% better expert discovery**.

Experience

Terrantic **Apr 2026 – Present**

Product Manager *Bangalore, India*

- Own product for a **financial settlement and accounting platform, live with 2 large enterprise customers**, replacing complex, calculation-heavy Excel workflows with one system for revenue, costs, deductions, and supplier payouts. Lead a team of 1 designer and 2 engineers.
- Shipped a **supplier portal and dashboards** giving suppliers and finance teams self-serve visibility into inventory, allocations, and **projected earnings**.
- Defined requirements for **AI recommendation agents** that schedule charges and generate reports: responsibilities, tool-calling workflows, data sources, guardrails, edge cases, and escalation paths.
- Ran **user testing** with customer finance teams and tracked defects with engineering, catching settlement edge cases before go-live.

BossWorks **Feb 2024 – Mar 2026**

AI/ML Engineer → Associate Product Manager *Bangalore, India*

- Built (as AI/ML engineer) and then productized a **multilingual AI news summarization feature**: wrote the PRD, defined success metrics, and handed it to the team, contributing to a **12% increase in DAU**.
- Improved **expert discovery by 35% within 2 weeks**: ran funnel analysis to locate drop-offs, found multilingual users searching in 2–3 words with no relevant results, then shipped real-time semantic search suggestions, multilingual matching, and filters.
- Cut front-end development time **from 2 weeks to 3 days**: prototyped in Cursor following the front-end code rules, iterated live with the PM, and handed developers working code they used directly.
- Built an **evaluation framework** for AI agents scoring factual accuracy, context utilization, hallucination and grounding, safety compliance, and response quality.
- Owned an **AI-powered business launch platform** for first-time founders (AI business plans, financial planning, budgeting), defining requirements, conversation flows, prompt strategy, and expected model behavior for its AI assistants with AI/ML engineers.

Reliance Industries Limited **Jun 2023 – Aug 2023**

Data Analyst Intern *Shahdol, India*

- Built forecasting models that improved **prediction accuracy by 20%** and dashboards that cut reporting turnaround by **40%**.

Projects

Voice of Customer Copilot **Live demo** | **Case study**

AI copilot: app-store reviews to a ranked fix list *Python, Streamlit*

- Built a copilot that turns **4,600 app reviews into 10 ranked problems to fix**; AI reads, code counts and ranks.

Text-to-SQL Query Conversion

LLM pipeline for natural-language data access *Python, SQL, Streamlit*

- Built an **LLM pipeline** that converts natural-language questions into SQL, with a Streamlit interface.

Skills

Product: Product Discovery, PRDs, Roadmapping, Prioritization, Backlog Management, Funnel Analysis, User Research, User Testing, Stakeholder Management, Agile, Rapid Prototyping, Product Metrics

AI: AI Agents, Agentic Workflows, LLM Evaluation, Prompt Engineering, RAG, Semantic Search, AI Product Design, Workflow Automation

Data & Tools: Python, SQL, Data Analysis, Claude, Cursor, Lovable, Bolt, JIRA, Figma, Notion

Education

CHRIST University, MSc. Data Science, Bengaluru Jul 2022 – May 2024

Pt. SNS University, BSc. Computer Science, Shahdol Jul 2018 – May 2021

Achievements

Intel oneAPI Hackathon 2023 – Top 6 Finalist | Gold Medalist – 1st rank, BSc Computer Science
