Summary

AI Product Manager with a background in Data Science and AI/ML, experienced in building AI-powered B2B and B2C products in fast-paced startup environments. Skilled in product discovery, agentic AI workflows, rapid prototyping, and cross-functional execution.

Experience

Terrantic **Apr 2026 – Present**
Product Manager *Bangalore, India*

- Partner with enterprise stakeholders to **understand complex business goals**, fragmented workflows, and disconnected systems, translating operational pain points into AI-powered product requirements and solutions in collaboration with engineering teams.
- Drive development of a **financial accounting platform for the fresh-produce industry**, transforming fragmented, Excel-heavy workflows into a centralized tool for managing revenue, costs, deductions, and supplier settlements with improved financial visibility and traceability.
- Led **user testing** and cross-functional communication to refine accounting workflows, identifying edge cases and ensuring seamless UI/UX improvements through structured **defect tracking** and engineering collaboration.
- Define end-to-end **product requirements and business rules** for financial modules, leading cross-functional teams (engineering, design) through development and testing to ensure accurate and auditable financial records.
- Defined product requirements for AI assistants, specifying agent responsibilities, **tool-calling workflows**, inputs and data sources, **expected model behavior**, guardrails, edge cases, and escalation paths in collaboration with AI/ML engineers.

BossWorks **Feb 2024 – Mar 2026**
AI/ML Engineer → Associate Product Manager *Bangalore, India*

- **Owned end-to-end product development** of an AI-powered business launch platform, translating entrepreneur needs into product workflows spanning AI-generated business plans, financial planning, budgeting, and business execution.
- Led product definition for **AI-powered business assistants**, translating business use cases into functional requirements, conversation flows, prompt strategies, and expected model behavior in collaboration with AI/ML engineers.
- Reduced development iteration cycles by **30%** by building rapid prototypes using Cursor, Claude, and Lovable to validate product ideas and refine feature requirements before implementation.
- Improved **expert discovery by 35% within 2 weeks** by optimizing onboarding workflows and aligning product, marketing, and operations.
- Drove end-to-end development and launch of a **multilingual AI news summarization feature**, defining success metrics and contributing to a **12% increase in DAU**.
- Developed an **evaluation framework** for AI agents covering factual accuracy, context utilization, hallucination and grounding, safety compliance, and response quality, with defined evaluation criteria to assess agent performance.

Reliance Industries Limited **Jun 2023 – Aug 2023**
Data Analyst Intern *Shahdol, India*

- Developed forecasting models that improved **prediction accuracy by 20%** and built dashboards that reduced reporting turnaround time by **40%**.

Product & Technical Skills

Product Management: Product Thinking, Backlog Management, Cross-functional Coordination, Functional Testing, Bug Reporting, Product Roadmap, Rapid Prototyping, Feature Prioritization, Product Development, Sprint Execution
Data & AI: Python, AI-driven Workflows, Prompt Engineering, Workflow Automation, Data Analysis, Product Metrics, AI Agents, AI Product Design, SQL, RAG
Tools: Claude, Cursor, Lovable, Bolt, JIRA, Figma, Notion

Education

CHRIST University **Jul 2022 – May 2024**
MSc. Data Science *Bengaluru, India*
Pt. SNS University **Jul 2018 – May 2021**
BSc. Computer Science *Shahdol, India*

Achievements

Intel ONEAPI Hackathon 2023 – Top 6 Finalist | Gold Medalist – 1st rank in B.Sc. Computer Science | Scholarship Awardee – Academic excellence in 12th grade
